Temple University

Bachelor of Science, Computer Science

Relevant Coursework: Software Design, Discrete Math, Database Management Systems, Object-Oriented-Programming

Philadelphia, PA

Expected May 2027

CodePath

Relevant Coursework: Internship Connection Program, CYB101

San Francisco York, CA

Expected May-2027

WORK EXPERIENCE

McCormick Taylor

Web Developer Intern | C#, JavaScript, Blazor, Figma

Philadelphia, PA

May 2026- August 2026

- Using WordPress REST API and ClosedXML Library on C# to develop a script, migrating 157+ project records into an excel sheet.
- Engineered a C# data migration pipeline using the WordPress REST API and Dapper to import 150+ project records from the company website into a SQL Server database, eliminating manual data entry
- Assisting with the design and program of company internal web components, using Figma, C# and JavaScript.

OwlHacks

Graphic Design | Slack, Canva, Photoshop, After Effects

Philadelphia, PA

Dec 2024- Oct 2024

- Utilized Canva to design a sponsorship prospectus and collaborated on the theme for OwlHacks 2025, tailoring materials to appeal to investors and brands. Secured sponsorships from Fortune 500 companies like SAP, Google, Cigna, and Almac, as well as tech organizations like GitHub and Major League Hacking.
- Managed the creation of the OwlHacks 2025 trailer and designed graphics for the OwlHacks Instagram page, ensuring all deliverables were completed on time by coordinating with over 80+ team members via Slack. Increased social media engagement and event visibility through consistent and appealing visuals.

UNIVERSITY PROJECTS

Class Website | JavaScript, React.js, HTML, CSS

Oct 2025

- Designed and developed a responsive personal portfolio website throughout the semester using HTML, CSS, and JavaScript to showcase academic projects, technical skills, and coursework.
- Enhanced user experience through client-side interactivity and clean navigation, following accessibility and usability practices.

Neat-Street | Swift, XCode, Python, Hugging Face, Flask

Jan 2016

- Developed image-reading functionality using Flask and Python, enabling accurate item recognition and point calculations, streamlining user workflows for real-time predictions.
- Presented the application to 100+ students and developers during demo day at a hackathon, receiving professional feedback that guided further improvements and refinements.
- Designed a gamified recycling system to encourage community engagement and promote sustainability by rewarding users for correctly sorting and recycling trash.
